

Lesson 05 Overview

Project Monitoring and Controlling

Lesson Overview

During this week, students will learn processes, tools and techniques for monitoring project process. They will understand what it means to "control" a project. They will study status reporting and communications, as well as managing issues that arise.

Learning Objectives

You will:

- Understand the significance of monitoring cost, schedule and progress in a project
- Create cumulative cost curves to monitor project costs
- Study and develop reporting to facilitate project monitoring and control

Workflow

1. Read Wysocki Chapter 7: 267 - 290
2. PMBOK Annex A1: pages 450 - 458
3. Review PPT on Monitoring and Control
4. Review sample period and cum chart
5. Complete the Monitor and Control assignment
6. Read and study Bank of America case
7. Participate in Discussion forum for week 7
